

SQUARE+

Waterproof Polyester 600D - 215 GSM

SQUARE+ is the closest to the classic foldable gazebo. This gazebo is perfect for whom have a tiny exposition space but want to make it impressive and remarkable.

AIR+ Inflatable Gazebos use a special hermetic technology which creates a pneumatic inflatable. This means that, once inflated, the product will keep the air inside for days or even weeks.

You can finally say goodbye to annoying and noisy blowers and power supplies needed to keep the old PVC inflatables standing!

INCREDIBLE BENEFITS
